

Insect production

Nutrition – Applications

New industries

Insectinov 1, three years later, where do we stand?

Objectifs Insectinov 2

- Make a review of research breakthroughs and industrial developments
- Assess the sustainability of the whole sector chain, from upstream to downstream
- Produce a comprehensive update on latest research about biomass mobilization
- Identify the most sustainable processes that could form the core of a future biorefinery
- Discuss the prospects that can result from the use of insects: animal feed / human food

ORGANISATIONAL COMMITTEE

Danielle LANDO, *Adebiotech*
Samir MEZDOUR, *AgroParisTech*
Clarisse TOITOT, *Adebiotech*

SCIENTIFIC COMMITTEE

Sandrine DEREUX, *Pôle IAR*
Jean Philippe DESLYS, *CEA*
Antoine HUBERT, *Ynsect*
Philippe LE GALL, *IRD*
Michel LESSIRE, *INRA*
Frédéric MARION-POLL, *AgroParisTech*
Samir MEZDOUR, *AgroParisTech*
Christina NIELSEN-LEROUX, *INRA*
Maelenn POITRENAUD, *SEDE*
Philippe SCHMIDELY, *AgroParisTech*

Silver

Session themes

- Rearing insects: from research to industrial production
- Insect health and safety
- Prospects in human and animal nutrition
- Environmental, economic and societal approach in order to assess the relevance of each sector
